

DiskKeepCatalog Linux Installation Guide

This guide explains how to install and launch DiskKeepCatalog on Linux systems. The installer is designed to be simple and beginner friendly.

Download Installer

Download the installer from:

```
https://diskkeep.eventblastpro.com/DiskKeepCatalog\_Linux\_Installer.run
```

Installation Steps

1. Open a Terminal window.
2. Change to your Downloads folder.
3. Make the installer executable.
4. Run the installer.

```
cd ~/Downloads
```

```
chmod +x DiskKeepCatalog_Linux_Installer.run
```

```
./DiskKeepCatalog_Linux_Installer.run
```

What the installer does

- Installs DiskKeepCatalog into your home folder
- Creates desktop and menu launchers
- Preserves catalogs and registration information during upgrades
- Creates application shortcuts and icons
